## Summary

Passionate Information Technology undergraduate with strong proficiency in Java, SQL, and full-stack development. Possess working knowledge of Spring and Spring Boot with hands-on experience building scalable and secure applications. Strong foundation in OOPS and Agile methodologies with experience in REST API development, database integration and cloud.

## Education

**Shri Ramdeobaba College of Engineering and Management**

(2022 - 2026)

B.Tech in Information Technology

CGPA(current) :- 8.54

## Skills

**Languages:** Java, C, JavaScript, SQL

**Backend Technologies:** Spring, Spring Boot, Servlets, JSP, Hibernate, Node.js, Express.js

**Frontend Technologies:** HTML, CSS, React.js, Tailwind CSS

**Databases & Cloud:** MySQL, MongoDB, H2, AWS

**Tools:** Git & GitHub, VS Code, PgAdmin, Postman, Jira      **Proficiencies:** OOPS, DBMS

## Experience

**YouniformWala — Wordpress Developer Intern**

**Jun 2024 – Sep 2024**

- Designed and developed the company website using WordPress, creating custom themes, plugins, and UI components.
- Improved performance with mobile responsiveness and SEO optimization; earned a letter of recommendation for excellence.
- Technologies: WordPress, HTML, CSS, JavaScript, PHP, SEO, AWS.

**THM RBU Chapter — Logistics Team Member**

**Apr 2024 – May 2025**

- Organizing and managing events, ensuring smooth operations.
- Developing communication and coordination skills with team members and external partners.

## Projects

**MediBridge – Hospital Management System**

- Developed a role-based system with Admin, Doctor, and Patient dashboards for secure access control.
- Implemented appointment booking functionality for seamless scheduling.
- Enabled doctors to manage consultations and patients to schedule appointments.
- *Technologies Used:* Java Servlets, JSP, JDBC, MySQL, HTML, Bootstrap CSS

**Developing Secure Solutions for CPS in Healthcare Applications**

- Collaborating on the design of a secure architecture for healthcare cyber-physical systems to protect sensitive data.
- Built a prototype using Arduino and sensors to demonstrate secure data flow and system functionality.
- Implementing access control and simulating data transmission under threat scenarios.
- *Technologies Used:* Java, Spring Boot, Kotlin, PostgreSQL, PgAdmin, Google-Cloud-Platform

**BlogSpace - A Blog Platform**

- Developed a secure blog platform using Spring Boot and Spring Security with JWT-based authentication
- Designed RESTful APIs for user registration, login, and blog CRUD operations including draft and edit features.
- Implemented password encryption (BCrypt), global exception handling, and User-Blog relational mapping using JPA.
- *Technologies Used:* Java, Spring Boot, Spring Security, JPA, JWT, MySQL/PostgreSQL

## Certifications & Achievements

**HackerRank:** 5 Star Java, 3 Star SQL, 5 Star Problem Solving

**AWS Certified Cloud Practitioner – (AWS)**

**Introduction to Cloud Computing – (Coursera)**

**Postman API Student Expert – (Postman)**
